Customer Profile

Bohemia Manor High School is a public school operated by Cecil County Public Schools located approximately one mile south of the small town of Chesapeake City in Cecil County, MD. This is a small school of 685 students which shares its campus with Bohemia Manor Middle School. The school is also known by the nickname "Bo Manor."

Scope of Work

The original lighting at the "Bo Manor" field was inefficient, under lit, and hassle to maintain. Also, the specifications of the project required use of the existing poles and structures.

The Solution

A precision photometric design was completed to ensure that the design specifications were met. The design called for replacement (40 total) of the existing 1500W MH light fixtures to (48 total) of our FL9M -630W LED performance sports lights.

Solarone approaches each project as a unique opportunity to exceed the customers', the players' and the observers' expectations in terms of improved lighting delivered, improved visual comfort and operational savings. Our process steps help streamline this effort. We will meet directly with financial decision makers to go over final proposal in detail. Solarone will work with the customer's contractor to provide them with detailed computer aiming points which can be set while on the ground.
